1. Create a visualization to show the average median worker pay and average CEO salary for the category which you created in the previous question.

**Average of salary by Category**

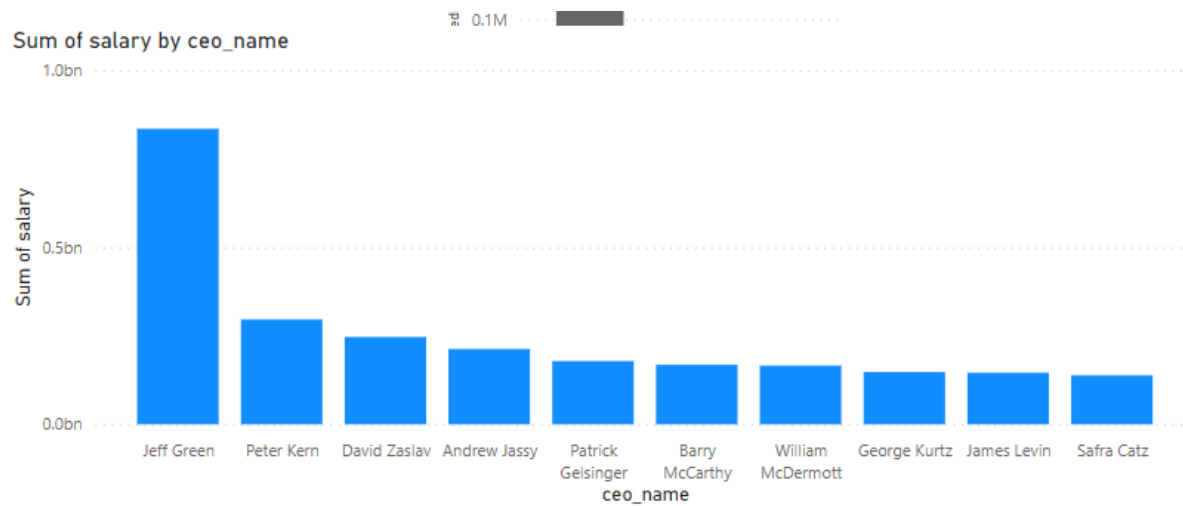

Average of median_worker_pay by Category

2. Create a visualization to show the average CEO multiple for the different industry.(Use the column which we created above)

Average of CEO salary multiple by industry

1. Create a visualization to show the name of top 10 CEO based on their salary. (Explore TOP N filter)

Sum of salary by ceo_name

1. Create a visualization to show the count of companies based on the different industries. Also, try to explore the formatting options available in the chart. Also give the appropriate title to the visualization.

Extract the first name of the CEO in a different column. Use it to find the list of First Name which are repeated more than 10 times.

company count in each industry
